Kajal Bharti

Senior Backend Engineer | Node.js | Distributed Systems | SaaS & Fintech Platforms

New Delhi, India | +91 85889 29662 | kajalbharti990@gmail.com | LinkedIn | GitHub | Portfolio

Profile Summary

Backend Engineer with **4.5+ years of experience** building scalable **Fintech**, **CRM**, and **SaaS** applications using **Node.js**, **Express.js**, **MongoDB**, **MySQL**, and **Redis**. Skilled in REST APIs, microservices, WebSockets, payment integrations, scalable architectures, **AWS**, **Docker**, **CI/CD**, caching, and system design.

Experience

Hydear Tech Pvt Ltd **Jun 2025 – Present**
Senior Backend Engineer *New Delhi*

- Leading backend engineering for CRM, fintech, and inventory management platforms using Node.js, Express.js, MongoDB, MySQL, and Redis.
- Architecting scalable REST APIs, authentication systems, workflow automation services, and real-time operational modules.
- Managing production deployments using AWS EC2, S3, RDS, Docker, PM2, NGINX, and CI/CD pipelines.
- Implemented Redis caching, queue-based processing, cron automation, and backend optimizations for scalable applications.

Freelance Backend Developer **Jan 2025 – Jun 2025**
Backend Developer *Remote*

- Developed scalable backend systems, payment integrations, operational dashboards, and REST APIs using Node.js, Express.js, MongoDB, and MySQL.

Actiknow Consulting Pvt Ltd **Jan 2023 – Jan 2025**
Software Engineer – Backend *New Delhi*

- Developed backend systems for telemedicine, CRM, affiliate, and fintech platforms using Node.js, MongoDB, and MySQL.
- Built healthcare workflows including appointments, video consultations, OHIF MRI/CT viewers, and RBAC dashboards.
- Worked on lender integrations, workflow automation, API integrations, and migration of legacy PHP modules to MERN architecture.

Paridhi Webtech Pvt Ltd **Jun 2021 – Jan 2023**
Web Developer *Gurugram*

- Developed business applications and backend modules using PHP, Laravel, CodeIgniter, and MySQL.

FinHeal Finserve Pvt Ltd **Nov 2020 – Jun 2021**
Software Developer *New Delhi*

- Built fintech backend modules, secure APIs, lender integrations, and authentication workflows using Node.js, Express.js, MongoDB, and MySQL.

Projects

SwiftDial CRM & AI Telecalling Platform | Live | *Node.js, MySQL, Redis, AWS*

- Architected a scalable multi-tenant CRM and AI telecalling platform supporting lead, campaign, subscription, and operational workflows.
- Developed REST APIs, RBAC modules, backend services, and real-time workflows using Node.js, Express.js, and MySQL.

- Integrated Meta Graph API, VoIP systems, WhatsApp APIs, webhook pipelines, and payment processing systems.
- Built a real-time billing engine with subscription validation, usage tracking, and secure Easebuzz S2S payment integration.
- Implemented Redis caching, queue-based workflows, cron automation, and scalable lead distribution pipelines.
- Managed AWS-based production infrastructure using Docker, NGINX, PM2, and CI/CD deployment pipelines.

Upniva Fintech Lead Orchestration Platform | Live | *Node.js, MongoDB, MySQL, Redis*

- Designed scalable database schemas, indexing strategies, and optimized SQL queries for high-volume CRM operations.
- Implemented real-time agent activity monitoring and WebSocket-based dashboard synchronization.
- Built secure authentication systems using JWT, RBAC, session validation, and permission-driven middleware.
- Developed intelligent lead assignment and routing engines based on campaign and agent workflows.
- Engineered fault-tolerant webhook pipelines with retry mechanisms, logging, and failure handling.
- Built scalable reporting and analytics modules for lead conversion, revenue tracking, and operational KPIs.
- Implemented bulk Excel/CSV processing pipelines with validation, duplicate handling, and async processing.
- Optimized backend performance using Redis caching, lazy loading, pagination, and API response compression.
- Built event-driven workflows using cron jobs, background workers, and queue-based processing.
- Integrated VoIP providers, WhatsApp APIs, SMS gateways, and email notification systems.
- Implemented monitoring, logging, and observability systems for debugging and backend reliability.
- Developed scalable SaaS subscription architecture with tenant isolation and usage-based billing.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, PHP, Python

Backend: Node.js, Express.js, REST APIs, Microservices, GraphQL, JWT, OAuth2, WebSockets, Socket.IO

Databases: MongoDB, MySQL, Redis, Sequelize, Mongoose

Cloud & DevOps: AWS (EC2, S3, RDS), Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, NGINX, PM2, CI/CD

Messaging & Queues: Redis Pub/Sub, RabbitMQ, Kafka, BullMQ

Tools: Git, GitHub, Linux, Postman, Swagger/OpenAPI, Jest

Architecture: System Design, Distributed Systems, Scalability, Caching, Queue-Based Architecture, Rate Limiting, API Security

Frontend: React.js, Redux, Bootstrap

Education

Indira Gandhi National Open University (IGNOU) **2021 – 2023**
Master of Computer Applications (MCA) *New Delhi*

Indira Gandhi National Open University (IGNOU) **2018 – 2021**
Bachelor of Computer Applications (BCA) *New Delhi*

Certifications

Skillfyme **Feb 2026 – Present**
DevOps with AI Masters Program

- **AWS | Docker | Kubernetes | Terraform | Ansible | Jenkins | GitHub Actions | GitLab CI/CD | DevOps | GitOps | AIOps**

Coding Ninjas **June 2023 – Feb 2025**
Full Stack Web Development

- **Full Stack (Node.js) | Full Stack Web Dev | Python | Generative AI | React**
